

AI in ERP

From System of Record to AI-Powered Insight

AI is transforming ERP from a system that records transactions to a system that delivers intelligence, insights and better business outcomes.

The Rapid Rise of AI in Enterprise & ERP

80%

of enterprises are expected to have deployed or used Generative AI by 2026, compared to less than 5% in 2023.

Source: Gartner

34%

of organizations prefer AI embedded within existing business applications (such as Microsoft Copilot) over building custom models.

Source: Gartner

\$5bn

Gartner forecasts ERP software revenue driven by Generative AI will increase from ~\$700 million in 2024 to \$5 billion by 2028.

Source: Gartner

30%

faster financial close processes by 2028 with AI-enabled Cloud ERP, driven by AI assistants, automation and predictive planning.

Source: Gartner

5%+

McKinsey notes AI is moving ERP beyond automation toward autonomous business processes and AI agents, with 5%+ EBIT improvements reported by early adopters.

The Evolution of ERP

Past

ERP as System of Record

Captures and stores business transactions

Today

ERP as System of Intelligence

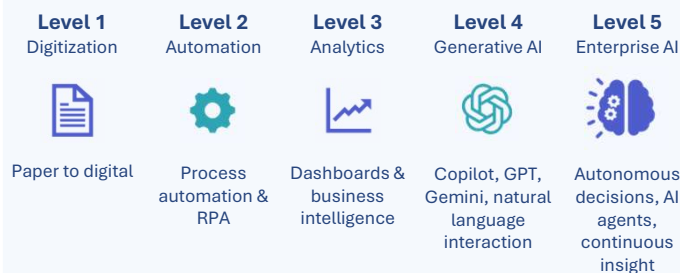

Provides visibility through reports, dashboards and analytics

Tomorrow

ERP as AI-Powered Insight

Delivers proactive insights, predictions and recommendations

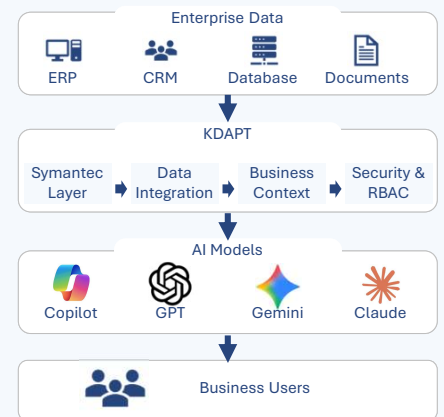

AI Maturity Model – Where Are You?

“Most companies think they're at Level 4. In reality... They're still somewhere between Levels 2 and 3.”

What KDAPT Brings Together

- 1 Structured and unstructured enterprise data
- 2 Natural language business queries
- 3 Semantic understanding of business terminology
- 4 Secure, role-based access
- 5 Context-aware AI responses
- 6 Cross-system insights and visualizations

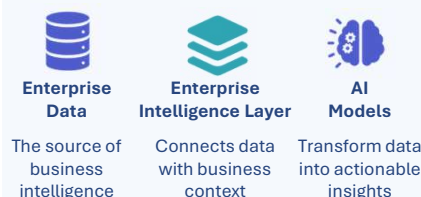

KDAPT doesn't replace your ERP or AI. It makes them work together intelligently

Why AI Is Exploding Now? Three Reasons

Key Takeaway

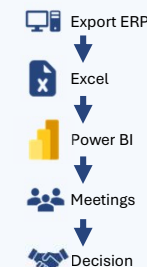

Enterprise AI succeeds when trusted data, business context, and AI models work together to deliver secure, accurate, and actionable insights

The power is in the connection

Before AI vs After AI

Before

After
